SANDS'S SARSAFARILLA.—Manuret, a physician of the last cenury, considered that cutaneous maladies had a manifest consection with the phases of the moon. He asserts that a patient afflicted with scald head always had an access of the disease when the moon changed. Modern science airtibates such phenomena to accidental coincidences. It is well understood at this day, that diseases of the skin have her source in the blood, as well as all those external disorders which are manifested in the form of sores, nincers, "Anadular swellings, &c. We seek a remedy, therefore, which will purity and disinfect that find, and in comparing the effects of the various preparations designed to set upon it, we believe Sands's Sarsaparilla will be found by far the most powerful, sefe and efficient. Scrofilous, billious and rheumaile patients will find it not only a baim for present suffering, but a means of radical circe.
